My dream for the future is...

Dream for the Future Tags: Outdoor Instructions

Materials Needed

printer
cardstock or heavy-duty, matte paper
scissors
kite string

Optional

hole punch
embellishments such as glitter, stickers, photos, etc.

How to Make It

1. Print your dream tags on cardstock or heavy-duty, matte paper and cut them out.
2. Next fill out the card using the lines provided (you can write on the back if more room is needed) and if desired, embellish your tag with glitter, stickers, photos, etc. to make it your own.
3. Punch a hole in the center of the circle at the top of the tag. Cut an 8-inch piece of cotton string and send the two ends through the hole and then back through its loop to cinch it (see diagram A).
4. Use the loose ends of the string to tie a bow around a tree branch or where ever else you want to share your dream for the future (see diagram B below).
5. When your dream comes true, replace your tag with the *Dream Come True* tag.
